# ICTs in education

Giza Castillo, Agatha Lipka, Belen Cardenas, Krishna Latin, Carlos Hernandez, and Zuriel Bustamante.

## 1 What is technological literacy?

It's the ability to understand and use technology, especially computers and digital tools, to access, manage, and communicate information.

## 2 What is knowledge deeping?

It's one of the 3 paradigms which involves different curricular goals for the use of ICTs. Knowledge deeping is the improvement of the effectivennes of learning through the use of ICTs.

## 3 What is knowledge creation?

It's one of the approaches to integrate ICT in education. It involves using the technology as a way to develop 21st century skills and to create knowledge. This can transform the teaching and learning processes by allowing the students to take an active role during their learning process.

## 4

### As a resource

It's a way to facilitate learning processes and go deep in content.

**Using ICTs for learning.**

VS

### As a goal

Mastering technological tools as a neccesary competence for a globalized society.

**Learning how to use ICTs.**

## 5 Benefits of its usage in the classroom

- **Motivation**: More interactive learning
- **Collaboration**: Encourages teamwork
- **Creativity**: Promotes innovation and content creation
- **Digital skills**: Develops technological competences
- **Access**: Easier and greater access to information and resources
